

COMPUGUARD LOCK

ANTI-THEFT TAG AND CABLE LOCK

CompuGuardLock double protection leaves thieves with no option.

Sometimes a warning just isn't enough.

CompuGuardLock goes beyond deterrence with a heavy-duty reinforced anchoring system that adds physical restraint to your device to make sure it stays put.

Permanent dual protection is based on:

- Our **CompuGuard** Anti-theft Tag
- A heavy-duty cable
- Different keys for each cable
- A master key for the administrator

COMPUGUARD LOCK

ANTI-THEFT TAG AND CABLE LOCK

SPECIFICATIONS

CompuGuardLock is a unique dual protection system that stops thieves in their tracks.

This anchoring system is made-up of aviation-grade metal retaining clamp with a 3,5 cm circumference and an anchoring surface of 16 cm².

COMPUGUARDLOCK IS IDEAL TO SECURE:

- Multimedia projectors
- Desktop computers
- Laptop computers
- Public accessed Ipads
- Computers that do not possess Kensington ports: MacMini, MacBook Air, NetBooks, Ultrabooks, NAS Disc

DUAL LAYER OF PROTECTION ANTI-THEFT TAG AND CABLE LOCK

Heavy-Duty Reinforced Anchoring System

Building on the theft-deterrent features of our **CompuGuard** Anti-theft tag, we've created the ultimate theft-prevention system. A patented steel locking cable snaps into a receptacle in the center of our specially designed **CompuGuard** Anti-theft tag, adding a double layer of protection for laptops and other mobile devices, protecting them from "snatch-and-run" thieves. When you remove the cable lock to transport the device, the **CompuGuard** Anti-theft tag remains in place, ensuring our Anti-theft protection and 24/7 recovery service.

COMPUGUARD LOCK

ANTI-THEFT TAG AND CABLE LOCK

DUAL PERMANENT PROTECTION COMPUGUARD ANTI-THEFT TAG AND CABLE LOCK

Like the Standard **CompuGuard** Anti-Theft tag, the **CompuGuardLock** is made of a rugged photo anodized aluminium plate imprinted with a bilingual dissuasive warning, a unique bar code and identification number, our website and 1-888-559-7867 24/7 number, active in Canada and the US. The **CompuGuardLock** clearly identifies your valuable devices, sending a strong “hands-off” warning to thieves.

The permanent chemical imprint “stolen property” beneath the **CompuGuardLock** remains permanently bonded to the device even if the plate is removed. Rendering the equipment useless to thieves. It eliminates the reason for theft: **RESALE VALUE.**

I3RS ASSET MANAGEMENT DATABASE

Like the standard **CompuGuard** Anti-Theft tags, the **CompuGuardLock** systems are registered in our I3RS asset management database for easy identification, inventory management and recovery.

The identification number and the bar code are systematically associated to each owner. Our numerous recoveries of equipment shows that this is the best solution for returning equipment in the least amount of time to its legitimate owner.

Our website stopoxygen.com and our toll free hotline 1-888-559-STOP are permanently visible on the **CompuGuardLock**, which allows an individual who may have found your equipment to make the right choice by contacting us immediately so that we may recover the equipment.

This service is for the life of the device, and is transferable to the new legitimate owner after we have verified with the registered owner that it is free and clear.

Once protected, it's for life!

BOND STRENGTH AND CHEMICAL IMPRINT

Plate Adhesive: 3M™ VHB Adhesive Transfer Tape
Gel: Cyanoacrylate Adhesive Gel

Each **CompuGuardLock** is backed with 3M's VHB (Very High Bond) which is reinforced by an adhesive gel to permanently bond the “Stolen Property” tattoo to the surface of the equipment.

The combination of these two adhesives creates a strong, permanent bond to the substrate, requiring up to 500 kg/cm² of force to break the bond. (Lab tested with a dynamometer)

Since 1997 with over **2,5 millions applications** on a wide range of substrates we guarantee the bond strength when our installation instructions are followed accordingly.

Our “Stolen Property” tattoo provides additional protection even if a determined thief removes the **CompuGuardLock** plate.

COMPUGUARD LOCK

ANTI-THEFT TAG AND CABLE LOCK

EACH COMPUGUARDLOCK KIT INCLUDES:

- > CompuGuardLock plate
- > 1,8 m steel cable lock with 2 keys.
- > Powergel glue
- > Red Warning Sticker
- > Alcohol Cleaning Swab
- > Instruction manual

Optional :

- > A master key

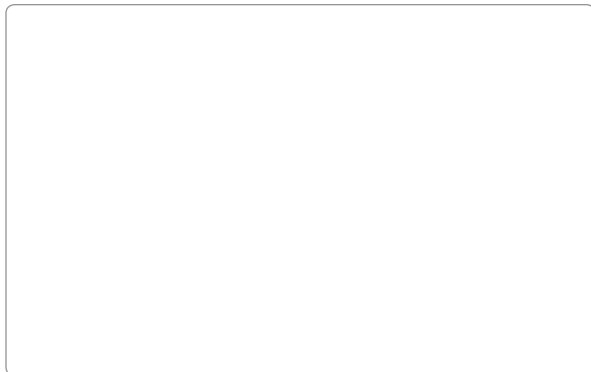

MASTER KEYS

Each **CompuGuardLock** Kit includes two dedicated keys that will open only the cable lock in that kit. Each key is uniquely numbered, with the first digit indicating the master series. This particular identification allows the purchase of 1 master key kit that corresponds to the series in your possession.

This option is very useful to facilitate the movement and maintenance of the equipment, when users do not possess a key, for laboratory computers, or to open the cable lock when the user has lost their key.

STOP Oxygen records the master key series for each **CompuGuardLock** Kit shipped. This way, you can be sure that all subsequent **CompuGuardLock** Kit orders will match that master key series.

ANCHORINGS

We offer independent anchoring systems when there is no physical one on the equipment or to link secondary equipment with the same cable lock.

These anchoring systems have a **3M VHB** adhesive that is reinforced with the Cyanocrylate **Powergel** glue.

PRICES AND CONDITIONS:

- > **Minimum order quantity: 20 units**
- > **CompuGuardLock** kit sold together
- > Replacement **CompuGuardLock** plate
- > Independent anchoring systems
- > Master key kit of 2 keys
- > No customization for **CompuGuardLock** plates
