

INSTALLATION GUIDELINES

COMPUGUARD ANTI-THEFT TAG

- ALWAYS CLEAN** the surface with a soft and dry cloth
- NEVER** use industrial chemicals or cleaners
- ALWAYS** affix **Compuguard** Anti-theft Tag on a visible but non-removable part of the item you want to protect.

1. Remove the protective film from the adhesive backing that is on the Compuguard Anti-theft Tag.
2. Apply LOCTITE glue on **the visible text of the chemical imprint and then around the border of the tag.** (see figure 2)
3. Place the Compuguard Anti-theft Tag to the chosen location. Apply pressure on all 4 sides to trap glue, then firmly press the center to ensure a good quality of chemical transfer.
4. If glue overflows a little, use the protective film to clean the excess. (Do not use paper like “Scott Towel”).
5. For increased deterrence add the red warning sticker.
6. **WARNING:** Aluminum or magnesium computers as well as phones and other small devices. Affix Compuguard Anti-theft Tag carefully on the casing because these

materials are slippery during application. Use scotch tape to pre-position anti-theft marking (withdraw tape within 10 minutes)

7. Connect to <https://anti-theft.org/i3rs/>
 - b) Click “Corporate”. User + password
 - c) Record information of the Compuguard Anti-theft Tag: material type, serial number, make, model, location and name of the person who is responsible of the item.

Your equipment is now protected and registered in the i³RS Database
For more information, please contact:
1-888-559-7867 or info@stopoxygen.com

WARNING !

- Warning: your equipment is not fully protected until its' registered. <https://anti-theft.org/i3rs/>
- When reselling your used equipment, never remove the Compuguard Anti-Theft Tag because it will reveal the chemical imprint and the words « Stolen Property». Simply update the i³RS Database and the transfer of ownership will be effective.
